Track, signalling and equipment alterations

District line

Trial of Wheel Flat Monitoring equipment between South Ealing and Acton Town

Description of works:

The trial equipment is a standalone installation that includes 4 rail sensors (as seen in the photo below) attached to the web of the rail. A conventional axle counter will also be installed adjacent to the sensors for comparison purposes.

Location:

Piccadilly line eastbound local between South Ealing and Acton Town adjacent to the decommissioned test track signalling cabin

Date of works:

Start date: Monday 21 September 2020

End date: Thursday 31 March 2022

Contact:

If you require more information in regards to these works please contact Trevor Stevens – Asset Operations, Signals Technical Services email: trevorstevens@tfl.gov.uk

Restrictions

Temporary and emergency speed restrictions

New Temporary Speed Restrictions (TSRs) will be published in the Traffic Circular for two weeks only.

Any removal of a speed restriction will be advertised for two weeks running up to its removal.

Emergency speed restrictions which are in force for longer than a week will be treated as TSRs.

Train operations managers must ensure that temporary and emergency speed restrictions are placed in the late notice case and the permanent notice case as appropriate.

Service control managers are responsible for ensuring information concerning speed restrictions is maintained throughout service control locations as appropriate.

LU bridge, underbridge and structure restrictions

Information on structure restrictions can be found on the Rule Book team SharePoint site. <https://transportforlondon.sharepoint.com/sites/TMSRuleBook>

click on Traffic Circular and follow the link for bridge and structure restrictions. All new entries are published in the Traffic Circular for publication and on the SharePoint site until withdrawn. Notice of withdrawn entries will also be published in the Traffic Circular for one issue.

Restrictions on underbridges

Various trains are restricted over the following bridges as shown in the table below:

Line / owner	Bridge no.	Location	Line / owner	Bridge no.	Location
Central BCV	U16B	Ruislip depot – West Ruislip end underbridge supporting Ruislip DT tracks at the West Ruislip end DT entrance – crossing over Metropolitan line – Uxbridge branch. All engineers' trains and mainline rolling stock restricted to 5 mph/8 kph.	District MR SSL	D240	Both midway between Southfields and Wimbledon Park – 650m south of Southfields station (Revelstoke Road) no mainline rolling stock rated above Network Rail classification RA8 to cross this structure.

Line / owner	Bridge no.	Location	Line / owner	Bridge no.	Location
District SSL	D235	Both East Putney to Southfields – 380m north of Southfields (Granville Road) no mainline rolling stock rated above Network Rail classification RA8 to cross this structure.	Jubilee	MR33B	North of Wembley Park SB Metropolitan fast and SB Metropolitan local only. Steam locomotives are restricted to 10 kph over the bridge. The SB Jubilee, NB Jubilee, NB Metropolitan local and NB Metropolitan fast do not pass over this bridge and are unaffected.

All engineers' trains to pass over the following structures at 5 kph until further notice.

No restriction to passenger trains.

Note – restrictions only apply to the Piccadilly line and not the District line which may run over the same bridge – it is an issue associated with the longitudinal timbers supporting the track.

Line	Bridge	Direction
Piccadilly tube lines	D83	Piccadilly line eastbound fast between Ravenscourt Park and Hammersmith (crossing over public highway Cambridge Grove)

Rolling stock restrictions other than bridges

Location	Line	Restriction
Neasden depot wheel monitoring equipment building	Metropolitan SSL	Prohibition on all rolling stock with a distance of less than 15.7m between both outer axles
North Acton	Central BCV	Platform 1, ALL sub-surface stock restricted to 10 mph
Neasden depot road 36 high level cleaning platforms	Metropolitan SSL	Prohibition on vehicles other than S stock (8 car or 7 car trains) entering this road

Loading restrictions on structures other than underbridges

Passenger loading only refers to a load not in excess of ½ tonne (500 kg) on an area 1m x 1m², including for example such items as cable drums, large plant, and storage of construction materials.

Any queries on this will be clarified by Richard McKoy 0207 126 3998 Auto: 63998. Deviations from these restrictions and prohibitions will only be permitted by written authority of the relevant civil asset engineer.

Introduction of Piccadilly line Timetable Notice No. 110/20 (Temporary Autumn Timetable)

When: Monday 5 October to Wednesday 23 December

Principal Changes:

All Week

Temporary 30mph speed restrictions will apply on the following sections:-

- Cockfosters – Arnos Grove, both directions
- Boston Manor – Hounslow West, both directions
- North Ealing – South Harrow, both directions

In consequence, run times have been adjusted in these areas with train journeys taking up to 5 minutes longer in each direction. Generally, customers travelling between central London and the outer areas will find their journey time extended by up to 3 minutes.

Rail Adhesion Trains, formed of 3 cars of 1973 tube stock, will operate between Cockfosters and Arnos Grove and between Acton Town, Hatton Cross and Rayners Lane/Uxbridge prior to start of traffic, then at 5-6 hour intervals throughout the traffic day.

All Rail Adhesion Train movements to/from Cockfosters depot east end, will run via No. 30 road and Cockfosters platform 1.

All Rail Adhesion Train movements to/from Northfields depot, will start/stable via the east end.

Test Train Paths between Northfields and Cockfosters depot have also been scheduled on all days.

Additionally, in connection with the temporary closure of Terminal 4 at Heathrow Airport, Heathrow Terminal 4 station will remain closed for the duration of the Autumn Timetable. All westbound trains booked to operate via Terminal 4 will terminate at Hatton Cross, detrain, then operate empty via the Terminal 4 loop and re-enter passenger service at Heathrow Terminals 1,2,3 eastbound.

Mondays to Fridays

Two fewer trains will operate the scheduled peak service (77 instead of 79), as one train has been converted for use as Rail Adhesion Trains and the other will remain spare, to cater for increased fleet maintenance requirements during the autumn period. Together with the temporary speed restrictions this means some service levels have been reduced.

Peak services have been slightly reduced in the central area to operate at 23 trains per hour (tph) with a reduced service on the Rayners Lane/Uxbridge branch of 8tph with alternate trains (4tph) operating to/from Uxbridge.

During off-peak periods, a 69-train service will operate providing 21tph in the central area, normal western branch frequencies but a slightly reduced service between Arnos Grove and Cockfosters with 6tph reversing at Arnos Grove and 15tph operating to/from Cockfosters.

Saturdays

The weekday off-peak 69-train, 21tph service will operate for most of the day. From 12.00 until 19.00 the central area service frequency will increase to 22tph, with an additional trip between Arnos Grove and Northfields each hour between these times. This service requires 72 trains, a reduction of 4 trains from the normal 24tph Saturday afternoon service.

Sundays

An 18tph service has been scheduled for most of the day with the enhanced 21tph service operating between 13.00 and 18.30. The evening football spare trains have been withdrawn.

Introduction of District line Timetable Notice No. 107/20 (Temporary Amendments to Working Timetable No. 150 for Piccadilly line Autumn Timetable)

When: Monday 5 to Friday 30 October

Principal Changes:

In connection with a Temporary Working Timetable on the Piccadilly line for autumn weather arrangements, minor re-timings to the District line Ealing Broadway branch train service will apply.

Introduction of Metropolitan line Timetable Notice No. 125/20 (Temporary Timetable for Leaf Fall Arrangements)

When: Monday 5 October to Wednesday 23 December

Principal Changes:

Revisions have been made to allow southbound trains to generally run 3½ minutes earlier from Amersham and Chesham, 2½ minutes earlier from Chalfont & Latimer and 1½ minutes earlier from Chorleywood due to speed restrictions caused by the leaf fall arrangements.

The Metropolitan line Rail Adhesion Train (Train 710) will operate daily.

Revisions to Chiltern Railways train services due to leaf fall arrangements have been incorporated as have paths for the Network Rail Water Jetting and Sandite train:- Network Rail, Rail Head Treatment Train, Train Reporting Numbers 3J04, 3J05, 3J07 and 3J08 (operated by Freightliner) – formed of 2 x Class 66 locomotives (tripcock fitted), top and tailing 3 x 60ft container wagons. This train will not operate after Saturday, 12th December.

The Piccadilly line will be operating Autumn Temporary Timetable Notice No. 110/20. In consequence, there are significant revisions to Uxbridge branch services. In addition, a Piccadilly line Rail Adhesion Train (Train 730) will operate daily on the Uxbridge branch.

Station and platform closures

No rail replacement bus services will be provided unless otherwise stated.

Passengers must be advised to use alternative rail routes, nearby alternative stations and local bus services where appropriate. Late night passengers must be advised to commence their journey earlier than normal to maintain last train connections.

Acceptance of Train Operating Company tickets and passes on LU services during planned engineering works

Acceptance of Train Operating Company tickets and passes on LU services during planned engineering works.

London Underground will accept all National Rail paper tickets from the relevant Train Operating Companies listed below as per the dates, times and stations shown. TOC staff passes should also be accepted where indicated. Customers using Oyster PAYG will be required to pay the appropriate fare for the journey they are making. Tickets being accepted will generally not work the automatic gates so the holders should be passed through the manual gate following a visual check for validation.
