4 Status reports and amendments to instructions

This information can be found on The Management System Rule Book SharePoint site. Updates are published in this section.

5 Communications, vacancies and training courses

This section gives details of London Underground communications relevant to operational staff, vacancies and transfer lists (where appropriate), training courses and other lifestyle initiatives.

Track, signalling and equipment alterations

Platform temperature and humidity monitoring

From Monday 31 August 2020 for two weeks, staff from TfL Vehicle Engineering – Technical Services will be on all sub-surface line platforms to download information from “Tinytag” loggers using handheld tablet PC’s. This work will be undertaken during traffic hours.

Please note that under LU Rule Book concession CR08401, these staff are not required to book in as visitors at each station due to the brevity of the task. The time per logger is expected to be a few minutes, so no contact is required be made with the station staff.

Circle and Hammersmith & City, District and Metropolitan lines

Start of Communication Based Train Control (CBTC) operation of Battery locomotives type 'A' between Hammersmith (C&H) – Finchley Road / Paddington (Circle) / Euston Square

The Four Lines Modernisation project has commissioned software to enable the operation on Battery Locomotive type 'A' Engineering locomotives under CBTC control between Hammersmith – Finchley Road / Paddington (Circle) / Euston Square.

From start of traffic on Monday 31 August 2020, Battery Locomotive type 'A' will be permitted for use in these areas under CBTC control and new four foot 'E' stopping diamonds will be brought into use for Engineers Vehicle operators only.

At Hammersmith platform 1, any Engineers train consist greater than 95m will result in the east end of the formation being positioned over 21A points.

'E' Stopping Diamonds will be positioned in the four foot (unless otherwise stated) at the following locations:

Restrictions

2

Temporary and emergency speed restrictions

New Temporary Speed Restrictions (TSRs) will be published in the Traffic Circular for two weeks only.

Any removal of a speed restriction will be advertised for two weeks running up to its removal.

Emergency speed restrictions which are in force for longer than a week will be treated as TSRs.

Train operations managers must ensure that temporary and emergency speed restrictions are placed in the late notice case and the permanent notice case as appropriate.

Service control managers are responsible for ensuring information concerning speed restrictions is maintained throughout service control locations as appropriate.

LU bridge, underbridge and structure restrictions

Information on structure restrictions can be found on the Rule Book team SharePoint site. <https://transportforlondon.sharepoint.com/sites/TMSRuleBook>

click on Traffic Circular and follow the link for bridge and structure restrictions. All new entries are published in the Traffic Circular for publication and on the SharePoint site until withdrawn. Notice of withdrawn entries will also be published in the Traffic Circular for one issue.

Restrictions on underbridges

Various trains are restricted over the following bridges as shown in the table below:

Line / owner	Bridge no.	Location	Line / owner	Bridge no.	Location
Central BCV	UI6B	Ruislip depot – West Ruislip end underbridge supporting Ruislip DT tracks at the West Ruislip end DT entrance – crossing over Metropolitan line – Uxbridge branch. All engineers' trains and mainline rolling stock restricted to 5 mph/8 kph.	District MR SSL	D240	Both midway between Southfields and Wimbledon Park – 650m south of Southfields station (Revelstoke Road) no mainline rolling stock rated above Network Rail classification RA8 to cross this structure.

Line / owner	Bridge no.	Location	Line / owner	Bridge no.	Location
District SSL	D235	Both East Putney to Southfields – 380m north of Southfields (Granville Road) no mainline rolling stock rated above Network Rail classification RA8 to cross this structure.	Jubilee	MR33B	North of Wembley Park SB Metropolitan fast and SB Metropolitan local only. Steam locomotives are restricted to 10 kph over the bridge. The SB Jubilee, NB Jubilee, NB Metropolitan local and NB Metropolitan fast do not pass over this bridge and are unaffected.

All engineers' trains to pass over the following structures at 5 kph until further notice.

No restriction to passenger trains.

Note – restrictions only apply to the Piccadilly line and not the District line which may run over the same bridge – it is an issue associated with the longitudinal timbers supporting the track.

Line	Bridge	Direction
Piccadilly tube lines	D83	Piccadilly line eastbound fast between Ravenscourt Park and Hammersmith (crossing over public highway Cambridge Grove)

Rolling stock restrictions other than bridges

Location	Line	Restriction
Neasden depot wheel monitoring equipment building	Metropolitan SSL	Prohibition on all rolling stock with a distance of less than 15.7m between both outer axles
North Acton	Central BCV	Platform 1, ALL sub-surface stock restricted to 10 mph
Neasden depot road 36 high level cleaning platforms	Metropolitan SSL	Prohibition on vehicles other than S stock (8 car or 7 car trains) entering this road

Loading restrictions on structures other than underbridges

Passenger loading only refers to a load not in excess of ½ tonne (500 kg) on an area 1m x 1m², including for example such items as cable drums, large plant, and storage of construction materials.

Any queries on this will be clarified by Richard McKoy 0207 126 3998 Auto: 63998. Deviations from these restrictions and prohibitions will only be permitted by written authority of the relevant civil asset engineer.

Central line supplement update

Central line supplement has been updated online to version 2.7.

Briefing and line supplements can be accessed via link:

<https://transportforlondon.sharepoint.com/sites/TMSRulebook/Rule%20Book%20MS/Forms/LineSupplementsRB.aspx>

Jubilee line supplement update

We have updated the locations of rail gap jump leads in section 2.3 of the Jubilee line supplement. The supplement has now been updated to version 3.3 and is available to download online on the rule book site via link:

<https://transportforlondon.sharepoint.com/sites/TMSRulebook/Rule%20Book%20MS/Forms/LineSupplementsRB.aspx>

4

We have updated the 'if automatic train protection is not available' section within chapter 3.2 Passing an automatic signal and block marker board at danger of the Central line supplement.

The amendment clarifies that in cases of multiple signals failing, or track circuit failure, the signaller will advise the train operator of the exact number of block marker boards they can pass without stopping to reach the next colour light signal.

The Central line supplement has been updated to version 2.7 on the intranet.

The updated line supplements are available on the [Rule Book webpage](#).

Hard copies will be provided at the next available reprint.

We have made changes to the Jubilee line supplement affecting the following areas:

- section 1.4 Other rules affected by transmission based train control has been amended to incorporate the content of written notice LU-WN-01624 published in December 2019
- written notice LU-WN-01624 has been withdrawn as this has now been incorporated into section 1.4 Other rules affected by transmission based train control as stated above
- the locations of rail gap jumper leads in section 2.3 Rail gap jumper leads has been updated.

Amendment to section 1.4 Other rules affected by transmission based train control and the withdrawal of written notice LU-WN-01624

We have added an information box to the end of section 1.4 to clarify that where it states 'when persons are on or about the track, a temporary speed restriction of 12mph (20kph) must be applied for the area concerned' it relates to rules set out in Rule Book 7 Train incidents and safety equipment, sections 8.1 Unconfirmed report of persons on the track and 8.3 If trespassers are on the track. This amendment incorporates the content of written notice LU-WN-01624 published in December 2019 and, as such, this written notice has been withdrawn with immediate effect.

Amendment to the locations of rail gap jumper leads in section 2.3 Rail gap jumper leads

We have removed rail gap jumper leads location at Neasden depot at 38 road by training school south end from section 2.3.

The following rail gap jumper leads locations have been added to section 2.3:

Neasden

- room 2/281, old station supervisor's office on southbound platform

Stratford Market Depot

- adjacent to depot entrance gate
- adjacent to tower
- staff halt at West Ham end

Stratford station

- between platforms 14 & 15 through barrier at end of platforms

Wembley Park station

- platform 3

The Jubilee line supplement has been updated to version 3.3 on the intranet.

The updated line supplement is available on the Rule Book site here.
